The Group recorded a revenue of RM2.4 million for the current quarter, representing a decrease of RM0.4 million or 15% against the corresponding quarter ended 31 March 2021. Revenue from the manufacturing segment recorded a decrease of RM0.7 million compared to the corresponding period and revenue from the financial services segment contributed RM0.3 million in the current quarter. The lower revenue reported in the manufacturing segment was attributable to the sharp plunged in revenue from pressure vessels, LPG vessels and metal forming services by RM1.4 million with an offset from the increase revenue from storage tanks and road tankers by RM0.7 million.

Loss before tax ("LBT") increased to RM1.8 million from a LBT of RM0.7 million in the corresponding quarter mainly due to the drop in gross profit margin as a result of increase in raw material price and the recognition of share option expenses amounting to RM0.9 million from share options granted to eligible employees under the Company's SIS, calculated based on fair value of share-based payment, during the quarter.

The increase in LBT was partially offset by profit before tax contributed from the financial services of RM0.2 million.

Revenue from the manufacturing segment recorded a decrease of RM1.7 million while revenue from financial services segment recorded an increase of RM0.1 million compared to the preceding quarter. The overall drop in revenue from the manufacturing segment was mainly attributable to low sales volume in Q1 2022 as compared to the corresponding quarter.

#### Comments on results against the immediate preceding quarter (Cont'd)

Despite a lower revenue recorded during the quarter, the Group's LBT decreased by 81% to RM1.8 million from a LBT of RM9.3 million in the preceding quarter. This was mainly due to a lower share options expenses of RM0.9 million recognised during the quarter compared to RM8.4 million recognised in the preceding quarter. The share options expenses was derived from share options granted during the quarter calculated based on fair value of share-based payment.

#### **B3.** Commentary of prospects

The Board is of the view that the business environment remains challenging and competitive in view of the increasing steel material pricing and logistic costs which have affected the overall profit margins of the manufacturing segment. Moving forward, the group's performance may be affected by the spinning effect of the fluctuations in USD/RM exchange rates and the war between Russia and Ukraine resulting in world inflation. Amidst current market uncertainties, the Group will continue to remain cautious and continuously monitor the developments of the global economic growth situation by taking appropriate measures to pursue more projects to sustain the Group's business and improve the Group's performance.

Effective 1 April 2022, in transitioning to the endemic phase of COVID-19, Malaysia's national borders have been reopened to international travellers. The relaxation of the standard operating procedures is expected to improve the economic activities within the country and abroad. The Group will continue its effort to drive its performance improvements along the recovery of the economic environment.

Barring further unforeseen circumstances, the Group expects its overall performance for the financial year ending 31 December 2022 to remain challenging.
